BENGALURU CITY UNIVERSITY

SYLLABUS For B.Sc. ENVIRONMENTAL SCIENCE (I to VI Semester)

CHOICE BASED CREDIT SYSTEM

2020-2021

BENGALURU CITY UNIVERSITY

SYLLABUS For B.Sc ENVIRONMENTAL SCIENCE
(I to VI Semesters)

CREDIT BASED GRADUATE SYSTEM

2020-2021

BENGALURU CENTRAL UNIVERSITY

DEPARTMENT OF ENVIRONMENTAL SCIENCE

Regulations, scheme of study and examination for B.Sc. Environmental Science

Semester scheme 2018-19

I Objectives

- Awareness of public health hazards posed by our environment, including physical features such as global warming, chemical features such as automobile emissions, contaminants in drinking water, and biological features such as putrefying organic matter.
- Impact of governmental policies and urbanization on degradation of the environment
- Education, public- private partnership, corporate social responsibility (CSR) and change in management as way forward towards improving the Public Health thresholds.
- Educating the students on environmental policies with respect to water, air, forest and wildlife of the country.

II Eligibility for Admission

The eligibility condition for admission to B.sc environmental science shall be 10+2 or equivalent, in science stream with biology as one of the subject with a minimum of 35%.

III Duration of the Course

Duration of the undergraduate programmes shall extend over six semesters (three academic years).

IV Medium of Instruction

The medium of instruction and shall be in English

V Class room Attendance

A student shall be considered to have satisfied the requirement of attendance for the semester, if He or She has attended not less than 75% in aggregate of the number of working periods in each of the semesters.

VI Teaching and Evaluation

M.SC environmental science graduates those who have completed from recognized university regular candidates preferably with NET/KSET/ Ph.D are eligible to teach and take up the evaluation work.

VII Record Maintenance and Submission

- Every college is required to establish a dedicated environmental science lab for the purpose of conducting practical

BENGALURU CENTRAL UNIVERSITY

DEPARTMENT OF ENVIRONMENTAL SCIENCE

Institutional scheme of study and examination for B.Sc. Environmental Science

Session: 2018-2019

Objectives

The course is designed to provide a broad-based education in the field of environmental science, covering the physical, chemical, biological, and social aspects of the environment. The course aims to develop the student's ability to understand the complex interactions between the natural and human-made environments, and to apply this knowledge to solve environmental problems. The course also aims to develop the student's critical thinking and problem-solving skills, and to instill a sense of social responsibility and environmental stewardship.

Structure of the Program

The program is designed to be completed in three years. The first year covers the basic sciences, the second year covers the environmental sciences, and the third year covers the advanced environmental sciences and a project.

First Year Courses

The first year courses are designed to provide a strong foundation in the basic sciences. The courses include: Physics, Chemistry, Biology, and Environmental Science I. The Environmental Science I course covers the basic concepts of environmental science, including the physical, chemical, and biological aspects of the environment.

Second Year Courses

The second year courses are designed to provide a deeper understanding of the environmental sciences. The courses include: Environmental Science II, Environmental Science III, and Environmental Science IV. The Environmental Science II course covers the physical and chemical aspects of the environment, while the Environmental Science III course covers the biological aspects.

Third Year Courses

The third year courses are designed to provide advanced knowledge and skills in the environmental sciences. The courses include: Environmental Science V, Environmental Science VI, and a project. The Environmental Science V course covers the social aspects of the environment, while the Environmental Science VI course covers the advanced physical and chemical aspects.

Electives

The program also offers a variety of elective courses in related fields, including: Environmental Policy, Environmental Law, Environmental Economics, and Environmental Management. These courses provide students with a broader perspective on the environmental sciences and their application in society.

- In every semester, the student should maintain a practical record book. This record book has to be submitted to the faculty for evaluation before the end of each semester.

VIII Scheme of Examination

- There shall be a University examination at the end of each semester. The maximum marks for the University examination in each paper shall be 70/100
- Out of the 30 marks of internal assessment, 15 marks for assignment (including field visit report) 10 marks as for internal assessment based on test. .05 marks based on attendance
- The field visit to be conducted every semester for practical exposure and marks for the same to be awarded based in the report

IX Minimum for a Pass

Candidates who have obtained a minimum of 35% marks in the University examination (i.e 25 marks out of 70 marks of theory examination) and 40 % in aggregate (i.e total of University examination and internal assessment marks in each subject shall be eligible for a pass or exemption in that subject.

X Carry over: A candidate who fails in a lower semester examination may go to the higher semester

XI Classification of Successful Candidates: CLASSES & GRADES Each semester result shall be declared in terms of Classes on the basis of Percentage of Aggregate Marks scored and in terms of grading system based on the marks scored. The results of successful candidates at the end of IV, VI and X semesters shall be classified on the basis of aggregate percentage of marks obtained in all the three, six semester the Aggregate or Cumulative Grade Point Average (CGPA) for award of i) Advance Diploma in Arts, Science and Commerce ii) Bachelors Degree in Arts, Science and Commerce iii) Integrated Masters Degree in Arts, Science and Commerce An eight point letter / alpha – sign grade as described below shall be adopted.

Table I: Conversion of Percentage of Marks into Grade Points in a Paper

%Marks in a paper/practical	Grade Point (GP)
96-100	10
91-95	9.5
86-90	9.0
81-85	8.5
76-80	8.0
71-75	7.5
66-70	7.0
61-65	6.5
56-60	6.0
51-55	5.5
46-50	5.0
41-45	4.5
40	4.0
Below 40	0

1. The Semester Grade Point Average (SGPA) shall be computed by dividing the sum of the Credit Points (CP) of all the subjects of study by the maximum credits for the semester. The CP are in

to be submitted for the faculty's evaluation by the end of each semester. The report should be submitted to the student advisor a practical record book.

VII Schedule of Examination

- * There shall be a theoretical examination at the end of each semester. The report should be submitted to the student advisor at the end of each semester.
- * Out of the 70 marks of practical work, 20 marks for design and 50 marks for report. 10 marks for theoretical assessment (out of 20 marks) should be awarded.
- * The field visit to be conducted every year for the practical aspects and marks to be awarded to be recorded in the report.

IX Grading for a Pass

Candidates who have secured a minimum of 55% mark in the theory examination and 50% mark in the practical examination and 45% in aggregate in a total of 120 marks in each subject shall be eligible for a pass or second class.

Early over a 10% mark shall be awarded to the candidates who secure 55% mark in the theory examination and 50% mark in the practical examination and 45% in aggregate. The result of the examination shall be based on the marks secured in the report and the practical work. The marks secured in the report shall be 20% of the total marks of 70 marks. The marks secured in the practical work shall be 50% of the total marks of 70 marks. The marks secured in the report shall be 20% of the total marks of 70 marks. The marks secured in the practical work shall be 50% of the total marks of 70 marks.

100% (Twenty marks) shall be awarded to the candidates who secure 100% mark in the report and 100% mark in the practical work.

90% (Eighteen marks) shall be awarded to the candidates who secure 90% mark in the report and 90% mark in the practical work.

80% (Sixteen marks) shall be awarded to the candidates who secure 80% mark in the report and 80% mark in the practical work.

70% (Fourteen marks) shall be awarded to the candidates who secure 70% mark in the report and 70% mark in the practical work.

The marks secured in the report shall be 20% of the total marks of 70 marks. The marks secured in the practical work shall be 50% of the total marks of 70 marks. The marks secured in the report shall be 20% of the total marks of 70 marks. The marks secured in the practical work shall be 50% of the total marks of 70 marks.

turn calculated as the product of the grade points earned in the paper and the credits assigned to that paper.

2. The details are given in Appendix B. Appendix B gives a summary of marks and credits assigned to different subjects of study in Bachelor Degree programmes in all the semesters. In these tables, 100(2), indicates the maximum total mark in a subject of study is 100, while the credit assigned is 2. These tables are followed with illustrations of computing semester grade point averages (SGPA) and aggregate or cumulative grade point averages (CGPA).
3. The Aggregate or Cumulative SGPA (CGPA) at the end of the fourth, sixth and ten semesters shall be calculated as the weighted average of the semester grade point averages. The CGPA is obtained by dividing the total of semester credit weightages by the maximum credits for the programme.
4. A candidate shall be declared to have passed the UG program if he/she secures at least an aggregate SGPA/CGPA of 4.0 (or Course Alpha-Sign Grade P

Table II: Final Result / Grades Description

Semester / Program % of Marks	Semester GPA / Program CGPA	Alpha-Sign / Letter Grade	Result / Class Description
90.0-100	9.00-10.00	O (Outstanding)	Outstanding
80.0-<90.0	8.00-<9.0	A+ (Excellent)	First Class Exemplary
70.0-<80.0	7.00-<8.00	A (Very Good)	First Class Distinction
60.0-<70.0	6.00-<7.00	B+ (Good)	First Class
55.0-<60.0	5.50-<6.00	B(Above Average)	Average) High Second Class
50.0-<55.0	5.00-<5.50	C (Average)	Second Class
40.0-<50.0	4.00-<5.00	P (Pass)	Pass Class
Below 40	Below 4.00	F (Fail)	Fail/Reappear
Absent	0	Absent	

- The candidates who pass all the semester examinations in the first attempts in three / Five Academic Years or Six / Ten Semesters are eligible for ranks provided they secure above 60% marks or at least an Alpha-Sign Grade B+.
- The results of the candidates who have passed the VI/X semester examination but not passed the lower semester examinations shall be declared as NCL (Not Completed Lower semester examinations). Such candidates shall be eligible for the degree only after completion of all the lower semester examinations.
- A candidate who passes the semester examinations in parts is eligible for only class and not for ranking.

SEMESTER – I

ENV 101 -Division of Environment

2 Credits/Week = 4hrs/Week, 52hrs/semester – 70 Marks

Unit 1

7 hours

Environmental Science – Definition, scope and importance Environmental Science ,Factors – Biotic and Abiotic factors- types, Divisions of the environment and their interactions – atmosphere, hydrosphere, lithosphere and biosphere.

Unit 2:

10 Hours

Atmosphere – Chemical composition and thermal structure; heat budget and earth's albedo. Weather and climate, Weather Elements – atmospheric pressure, temperature, relative humidity, precipitation, wind; Major climatic zones of the world, Agro-climatic zones of India.

Unit 3:

10 Hours

Hydrosphere– Definition, Importance and characteristics. Lentic and Lotic systems – Ice-caps, oceans, rivers, lakes, pond and ground water; Hydrologic cycle. Human usage of surface and Ground water; Water as a resource and its availability, types of aquifers and springs. Ground water potential. Water Budget.

Unit 4:

15 Hours

Lithosphere – Definition, structure and scope – internal structure of earth; Different kinds of minerals and rocks – Igneous, metamorphic and sedimentary – formation and types; Major landforms, Soil – formation, soil profile and classification. Physical, chemical, mineralogical and biological properties of soil. Soil Biota.

Unit 5:

10 Hours

Biosphere – Definition and extent, Biomes – types, characteristics, diversity and density – Tundra, Taiga, Temperature and Deciduous forest, Grassland, Desert, Tropical rain forest; A brief introduction to biogeography; India's biogeography.

ENV 102 PRACTICALS

1 Credits/Week = 3hrs/Week-35 Marks

1. Measurement of Max. and min. temperature, humidity and pressure, wind speed and direction
2. Sampling technique of water
3. Determination Of EC-conductivity method
4. Estimation of turbidity –nephelometric method
5. TS, TSS, and TDS-gravimetric and filtration method
6. Estimation of hardness
7. Estimation of chlorides
8. Measurement methods of precipitation and solar radiation.
9. A study of physiographic of aquatic systems.
10. A study of topography of terrestrial system using maps and topo-sheets.

Semester II

ENV 201- Environmental Biology

2 Credits/Week = 4hrs/Week, 52hrs/semester – 70 Marks

Unit 1: 4 Hours
Levels of organisation, Ecology, Divisions of ecology, approaches in studying ecology, auto ecology and synecology, structure and function, Biogeochemical cycles-types-carbon, nitrogen, phosphorus and sulphur cycles-anthropogenic influences on these cycles

Unit 2: 12 Hours
Ecosystems- Characteristics of ecosystems – Structure of the ecosystems –Functions of ecosystem- food chain-herbivorous and detritus food chains and food web- bio-magnification:Energy flow in an ecosystem, Study of pond and crop land ecosystems ;homeostatic and feed back mechanisms.

Major Ecosystems: types, structure and composition salient features – Forest ecosystem, Grassland ecosystem, Wetland ecosystem and Agro-ecosystem.

Unit 3: 12 hours
Community Ecology; Characteristics of a Community; ecology succession –Primary and secondary succession, Natural and man influenced succession, -Hydrarch and Xerarch – Climax vegetation and their theories; Ecotone and Edge effect: Ecological equivalents; Ecotypes and Ecophene; Ecological indicators Migration – emigration, Population Ecology: Natality, Mortality, age distribution, growth curves. Human population and its impact on environment.

Unit 4: 12 Hours
Evolution ;Definition- Darwin's postulates –Natural selection-types-Industrial Melanism- Pesticide resistance. Co-evolution; Mimicry – Batesian and Mullerian mimicry, warning coloration Effect of climate (light, Temperature, Wind and water), Edaphic, Topographic and Biotic factors on plants ; Effect of light, Temperature water and soil on animals.

Unit 5: 12 hours

Environmental microbiology and biotechnology-bioleaching, bioremediation of various pollutants like DDT, heavy metals, surfactants, oil slicks from water and soil, determination of potability of water by MPN method, Biofertilizers and Biopesticides

ENV -202 Practicals

35 Marks

1 Credits/Week= 3hrs/ Week,

1. Study of vegetation sampling methods – Quadrat and transects
2. Estimation of frequency, density and abundance of species by quadrat/plot method.
3. Estimation of productivity of water bodies by Gaarder-gran method.

4. Estimation of productivity of crop plants by harvest method.
5. Determination of leaf area by graphical method.
6. Estimation of terrestrial productivity – Chlorophyll method.
7. Quantitative estimation of planktons and zooplanktons–Sedgwick – Rafter method.
8. Isolation of bacteria from water /wastewater using serial dilution method
9. Estimation of coliform bacteria- MPN technique and MF technique
10. Identification of Ecological Indicators.

SEMESTER III**ENV 301- Environmental Chemistry and Earth science**
2 Credits/Week = 4hrs/Week, 52hrs/semester – 70 Marks

Unit:1

8 hours

Atmospheric Chemistry: Chemical composition of air, Classification of elements, chemical speciation. Particles, ions and radicals in the atmosphere. Chemical processes for formation of inorganic and organic particulate matter. Thermo-chemical and photochemical reactions in the atmosphere. CFC's and Ozone chemistry, chemistry of air pollutants, photochemical smog

Unit:2

12 hours

Water chemistry: properties of water, water pollutants- types sources heavy metals metalloids-organic, biological and radioactive- types of reactions in various water bodies including marine environment, Cationic, Anionic and non-ionic detergents, modified detergents.

Chemistry of some Heavy Metals-Chemistry of Pb, Hg, Cd and As-Physical and chemical properties, Behavior of these heavy metals and their Compounds, Human exposure absorption and influence

Unit:3

10 hours

Soil Chemistry: Soil profile, distribution of inorganic and organic components in soil, Chemical properties of Soil - Saline, Acidic and Alkaline soils. Major micro and macro nutrients of soil, Nutrient Pathways - Nitrogen, Phosphorus and Potassium pathways in the soil.

Unit :4

10 hours

Environmental Analysis- Solution concentration (Normality, Molarity, Molality, ppm, Equivalent weight etc.) Titrimetric methods, Instrumentation, Principle and working of pH meter and conductivity meter. Colorimetry, Spectrometry, UV-Vis and IR Spectrophotometer and AAS. Nephelometry, Flame Spectrometry and fluorimetry; Chromatographic techniques: Paper, Thin Layer, GC and Gas – Liquid Chromatography, HPLC, X-ray florescence, X-ray diffraction, Electrophoresis.

Unit :5

12 hours

Earth's Materials – Minerals and their definition. Distribution and abundance of elements in the major units of earth, Geochemical features, Formation and classification of Rocks. Folds, faults, dykes and other geological formations and their environmental significance. Geographical classification and zones of Environment. Energy budget of the earth. Earth's thermal environment and seasons. General relationship between landscapes, biomes and climate. Climate of India.

ENV 302 practical
Credits/Week= 3hrs/ Week

1. Mineralogy – Identification of common rock forming minerals.
2. Petrology – Identification of major rock types – Igneous, Metamorphic and Sedimentary.
3. Determination of Alkalinity from water.
4. Estimation of Sulphates in water sample.
5. Estimation of nitrates in water sample.
6. Estimation of fluorides in water sample.
7. Estimation of particulate matter, sulphur dioxide and oxides of nitrogen in ambient air.
8. Visit to research institutes and study of instruments like GC,HPLC, AAS,
9. Visit to meteorological and air monitoring stations

SEMESTER IV

ENV 401- Natural Resources and Management

2 Credits/Week = 4hrs/Week, 52hrs/semester – 70 Marks

- Unit:1 12 Hours
Definition of Natural resources; Classification of natural resources based on utility potential. Water resources in India- Water budget of India . Dams: Types- Impact on environment – alternatives ; Floods: Causes and control Strategies ; Water conservation Strategies in India –Watershed management ; Rain Water Harvesting; River linking
- Unit:2 8 Hours
Land resources in India-Agriculture : Types and cropping patterns –Range Lands-Management; Mining, Quarrying and their impacts ;Soil erosion: causes-Types-Impacts-Control measures
- Unit:3 10 Hours
Energy Resources and Conservation: Definition- Classification of energy resources; Conventional: Fossil fuels , Nuclear energy and their impacts. Non-conventional : Solar, Wind, Tidal, Microhydel, Ocean Thermal energy, Geothermal.
- Unit 4 10 Hours
Forest Resources: Importance of Foresty- Types of Forests-Impacts of Deforestation; Minor forest Products; Forest based Industries; Forest Fires and their control; Forest conservation : Social Forestry-Agroforestry –Sacred Groves-Joint forest Management; Chipko and Appiko Movements; Ecotourism and its impacts. Salient features of the Indian forest Act, 1927
- Unit:5 12 Hours
Biodiversity : Definition –Levels of Biodiversity; values of biodiversity; Biodiversity Hotspots; Threats to Biodiversity, Strategies of Conservation and Management ;Bio-piracy; Biodiversity Bill, 2000. Wild Life: Significance- Threats and Extinction – Endangered Species-Endemic species- In-situ and Conservation –Protected areas-National parks-Sanctuaries- Biosphere Reserves –Project Tiger and project Elephant; Red data book; Role of Indian organizations, IUCN, WWF and Greenpeace in Wildlife conservation. Salient features of the Wild life Protection Act,1972

ENV 402 practical 35 Marks

1 Credits/Week= 3hrs/ Week

1. Identification of medicinal plants of Karnataka.
2. Identification of endangered flora and fauna of India.
3. Introduction of Mapping&Properties of Maps and Direction and Scale
4. Latitude & Longitude ,Grid References
5. Conventional signs and symbols
6. Representation of Relief.
7. Study of Drainage Pattern and settlement pattern.
8. Study of national parks/sanctuaries

9. Study of selected exotic species of the Indian subcontinent a) naturalized weeds
b) Exotic plantation species
10. Design of solar energy trap/ Rain water harvesting.

SEMESTER V

ENV 501- Environmental Pollution and Waste Management

2 Credits/Week = 4hrs/Week, 52hrs/semester – 70 Marks

Unit1: 10 Hours

Air Pollution: Definition, causes of air pollution, classification of air pollutant–primary and secondary pollutants . Ozone, its depletion and effects; Greenhouse effect, its consequences .Meterology of Air pollution on Biosphere :Effect on human, plant and Materials. Control of Air Pollution : Settling Chambers, Inertial Separators, Cyclones, Filters, Electrostatic Precipitaors and Scrubbers.

Unit2: 12hours

Water Pollution: Sources of pollution of surface and ground water; Water pollution parameters – physical, chemical and biological; Classification of water pollutants. Effects of water pollution on water bodies and aquatic life, vegetation and human health.water quality Monitering-Units, equipment and methods. Treatment of water for drinking purposes. Water quality standards .Municipal Wastewater treatment-Sewage treatment-Preliminary, primary, secondary,-activated sludge process and trickling filters, Tertiary treatment methods- Reverse Osmosis and ion exchange .

Unit 3: 10 Hours

Soil Pollution – Sources of soil pollution, Pollution and residual toxicity from the application of insecticides, pesticides and fertilizers; Industrial waste and heavy metal interactions with soil components. Impacts of intensive agriculture on soil – water logging and soil salinity, their causes, impacts and remedies. Sampling techniques and Soil pollution control measures. Noise pollution – Definition, sources, effects and control; Noise pollution standards for different locations. Radioactive pollution and Thermal pollution.

Unit4: 10 hours

Solid waste management: Solid waste management and Disposal: Definition- Sources-Types; On-site handling, Storage and processing-Collection- Transfer and Transportation-processing-Recovery of materials and Disposal. Plastic management Rules,2011

Unit:5 8 Hours

Hazardous waste: Types,characteristics and classification. Biomedical and E-waste in India. Management of hazardous waste . Regulations for both urban and rural sectors.

Heavy metal pollution: Causes,Effects and Control measures with reference to Lead and Mercury.Pesticide Pollution: Causes , Effects and control measures with reference to Organo-chlorine pesticide.

ENV 502 Practical 35 Marks**Credit/Week= 3hrs/ Week**

1. Determination of Dissolved Oxygen
2. Estimation of Alkalinity
3. Estimation of SPM- High volume Air Sampler method
4. Estimation of SO₂- west ang Gaeke method.
5. Estimation of Iron- Phenanthroline method.
6. Estimation of Chromium – Diphenyl Carbazide method.
7. Estimation of Copper- Neocuproine method.
8. Estimation of BOD- Dilution method.
9. Estimation of COD- Dichromate Refluxion method.
10. Measurement of Noise- Noise level Meter
11. Estimation of Nitrate.

SEMESTER V**ENV 503 - Natural Disasters and Environmental Issues**
2 Credits/Week = 4hrs/Week, 52hrs/semester – 70 Marks

- Unit1: 10 Hours
Natural Environmental Hazards – Volcanoes, earthquake and tsunamis, flood, landslide and cyclones – types and their impact on environment. Natural hazards monitoring and management – pre and post hazard assessment and preparedness. Case studies on disaster mitigation.
- Unit 2 12 Hours
Manmade Environmental Hazards: Resource exploitation and environmental problems – Mining, Oil exploration and transportation, deforestation and their impacts on environment. Hazards due to solid, liquid and gaseous pollutants from industries – effect on ecosystem and humans; Hazards due to Lead, Cadmium, Mercury and Arsenic.
- Unit 3: 10 Hours
Environmental problems associated with urbanization – traffic, dust, aerosols and noise; their management; significance of urban open spaces (lung spaces, playgrounds, parks and greenbelts) and their management.
- Unit 4: 12 Hours
Modernization of agriculture and its impacts. Grasslands – overgrazing and land degradation, desertification, reclamation of degraded land; Wetlands – ecological significance, human intervention on wetlands, siltation and eutrophication, reclamamation of wetland.
- Unit 5: 8 Hours
Global Environment Issues: Green House effect, global warming, global dimming – causes and associated hazards, Ozone layer depletion – causes and associated hazards. Global summits, conventions and protocols on Environment – Stockholm, Rio de Janeiro, Johannesburg, Cancun, Rio+20; Kyoto protocol, Montreal protocol; COP, UNFCCC, IPCC.

ENV 504 Practical**35 Marks****Credits/Week= 3hrs/Week**

1. A study of major rock forming minerals.
2. A study of Igneous, Sedimentary and Metamorphic rocks.
3. Determination of moisture content of soil.
4. Determination of water holding capacity of soil.
5. Estimation of calcium and magnesium of soil.
6. Estimation of Oxidisable Organic matter of soil.
7. Reports on earth summit held at international level
8. Case studies on natural disasters
9. Field /industrial visit

SEMESTER VI**ENV 601- GIS & Remote Sensing and Statistics****2 Credits/Week = 4hrs/Week, 52hrs/semester – 70 Marks**

Unit 1: 12 Hours
 Satellites and their characteristics – Geo-stationary and sunsynchronous, Earth resource Satellites- Indian Space programme. Basics of remote sensing: Definition, concepts and principle of energy interactions with environmental components. Electromagnetic spectrum, Principles of radiation; radiation transfer.
 Remote Sensing; Active and Passive remote sensing. Ideal and Real remote Sensing characteristics. Fundamental of aerial photographic systems; Principle: Types of aerial cameras, aerial photos; ground coverage; radiometric characteristics, Interpretation principles and techniques and Applications of aerial photos.

Unit 2: 10 hours
 Sensors and Scanners- Profiles and geometry of scanners, different types of sensors, their characteristics, Digital image processing: Basic concepts and principles; image enhancement; edge enhancement; band rationing classification-supervised and unsupervised classification. Smoothing and filtering techniques; post classification smoothing classification accuracy enhancement; data merging; scale effects.

Unit 3: 8 hours
 GIS - Definitions, Components, History and Development. Concept of space and spatial data: types, characteristics, quality and sources of spatial data. Data input, verification, storage and output. Data stream, Geo-referencing and Map scale. Spatial Data Models - Raster Data Model, Vector Data Model. Database: Different formats for database.

Unit 4 : 10 hours
 Application of Remote Sensing, GPS and GIS for Environmental Planning and Management: Vegetation cover, Agriculture, Surface and Ground water, Watershed, Marine resources, Coastal zones, Wild life Ecology, Mining and Quarrying; Agriculture and range land application; earthquakes and flood mapping assessment

Unit 5: 12 hours
 Biostatistics :Defenition- Functions and Limitations of statistics.
 Diagrammatic Representation of Data: Line Diagram –Bar diagram- Pie diagram; Graphical Representation of Data: Histogram, Frequency polygon. Sampling Techniques: Methods of sampling-Random sampling methods- Non-random Sampling methods- Sampling and Non-sampling Errors. Measures of Central Tendency: Arithmetic means, Geometric mean-Median mode. Measures of Dispersion: Range, standard Deviation and Coefficient of variation.

ENV 602 Practical**35 Marks****Credits/Week= 3hrs/Week**

1. Preparation of thematic maps – A) Baseline maps B) Transportation Network and settlement maps c) Drainage maps d) Contour maps e) Slope Analysis maps f) Land-use/land-cover maps g) Wasteland maps

2. Interpretation of satellite data.
3. Land-use/land-cover classification from satellite data and toposheets.
4. Calculation of area using planimeter/grid method.
5. Comparative studies of the satellite and toposheet landuse/land cover data.
6. Delineation of drainage of a given area from satellite data.
7. Study of aerial photographs, photo interpretation for environmental studies and topographical maps.
8. Delineation of lineaments and dykes.
9. Collection of ground truth data.
- 10 GIS applications - advances software's of GIS- Arc GIS, ERDA
11. GIS Data analysis

SEMESTER VI

ENV 603- Environmental Management and Sustainable Development

2 Credits/Week = 4hrs/Week, 52hrs/semester – 70 Marks

Unit 1: 12 Hours

Environmental Impact Assessment (EIA): Concept of EIA, Environmental Inventory, Assessment of Physical and Biological and socio economic Environment – Various methods of EIA and their relation advantages – Adhoc, Checklist, Matrix, Networking and simulation modeling.

Unit 2: 10 Hours

Environmental Standards – Concept, Environmental protection standards; BIS, ISO, Environmental quality monitoring – ISO 14000 and its impact on developing countries. Comparison of Indian and International standards.

Unit3: 12 Hours

Climate Change: Climate change and policy frameworks – History of international climate change policies. United Nation Framework Convention on climate change (UNFCCC) – Key provisions of the UNFCCC, its structure, and different party groups under the convention - Annex I, Annex II and Non-Annex I countries. The Kyoto protocol and its associated bodies. Overview of Conference of Parties (CoP). Main climate change negotiations evolved over the past years and highlight some key issues relevant for a future climate change regime. Sustainable Development: Concept of sustainable development; carbon footprint, carbon trading; green buildings, clean technologies – rain water harvesting, ecofriendly lifestyles and products. Eco-labeling.

Unit4: 12 Hours

Environmental Laws: Environmental Laws and Constitutional provisions in India – Salient features – The Indian Forest Act, 1927, The Water (Prevention and Control of Pollution) Act, 1974, Air (Prevention and Control of Pollution) Act, 1981 and The Environment (Protection) Act, 1986; The Noise Pollution (Regulation & Control) Rules, 2000; Hazardous Waste (Management, Handling and Tran boundary movement) Rules, 2008; E-waste(Management & Handling) Rules 2011.

Unit5: 06 Hours

Environmental Movements: Major environmental movements – Chipko and Appiko movements, Narmada BachoAndolan, Kaiga and Kudankulam resistance, and any local specific environment issue. A brief account of the contributions of Indian environmentalists – Wangeri Maathai, MedhaPatkar, SundarlalBahuguna, SalumaradaThimmakka.

ENV 604 -Dissertation Work**35 Marks****(Dissertation work replaces the Practical paper of VI sem)**

1 Credits / Week = 3hrs/Week

- Each candidate is required to take up a dissertation work in applied aspects as a partial fulfillment of the course.
- The candidate may work either individually or in a group (Maximum of 5 students) under the supervision of a faculty member.
- Dissertation to be submitted individually towards the end of the VI semester for evaluation.

(Dissertation work replaces the practical paper of V1 year)

(Lecture Work = The Work)

- * Each candidate is required to take up a dissertation topic to explore aspects as a general field of the course
- * The candidate may work either individually or in a group (maximum of 5 students) under the supervision of a faculty member
- * Dissertation to be submitted individually towards the end of the VI semester for evaluation

End 3

UNIVERSITY GRANTS COMMISSION

Ability Enhancement Compulsory Course (AECC – Environment Studies)

Unit 1 : Introduction to environmental studies

- Multidisciplinary nature of environmental studies;
- Scope and importance; Concept of sustainability and sustainable development.

(2 lectures)

Unit 2 : Ecosystems

- What is an ecosystem? Structure and function of ecosystem; Energy flow in an ecosystem: food chains, food webs and ecological succession. Case studies of the following ecosystems :
 - a) Forest ecosystem
 - b) Grassland ecosystem
 - c) Desert ecosystem
 - d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

(6 lectures)

Unit 3 : Natural Resources : Renewable and Non-renewable Resources

- Land resources and land use change; Land degradation, soil erosion and desertification.
- Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations.
- Water : Use and over-exploitation of surface and ground water, floods, droughts, conflicts over water (international & inter-state).
- Energy resources : Renewable and non renewable energy sources, use of alternate energy sources, growing energy needs, case studies.

(8 lectures)

Unit 4 : Biodiversity and Conservation

- Levels of biological diversity : genetic, species and ecosystem diversity; Biogeographic zones of India; Biodiversity patterns and global biodiversity hot spots
- India as a mega-biodiversity nation; Endangered and endemic species of India
- Threats to biodiversity : Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions; Conservation of biodiversity : In-situ and Ex-situ conservation of biodiversity.
- Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational value.

(8 lectures)

Unit 5 : Environmental Pollution

- Environmental pollution : types, causes, effects and controls; Air, water, soil and noise pollution
- Nuclear hazards and human health risks
- Solid waste management : Control measures of urban and industrial waste.
- Pollution case studies.

(8 lectures)

Unit 6 : Environmental Policies & Practices

- Climate change, global warming, ozone layer depletion, acid rain and impacts on human communities and agriculture

Nandini N
 Chairperson (BOS U) BCU
 Dr. Nandini N. M.Sc., M. Phil., Ph.D.,
 Professor and Principal Investigator
 Dept. of Environmental Science
 Bangalore University
 Jnanabharathi, Bengaluru - 560 056.

UNIT 1: THE CELL

1.1 THE CELL: THE BASIC UNIT OF LIFE

- 1.1.1 The cell is the basic unit of life.
- 1.1.2 All living organisms are made of cells.
- 1.1.3 Cells are the smallest units of life that can perform all the functions of life.

1.2 THE CELL: THE BASIC UNIT OF LIFE

- 1.2.1 The cell is the basic unit of life.
- 1.2.2 All living organisms are made of cells.
- 1.2.3 Cells are the smallest units of life that can perform all the functions of life.

1.3 THE CELL: THE BASIC UNIT OF LIFE

- 1.3.1 The cell is the basic unit of life.
- 1.3.2 All living organisms are made of cells.
- 1.3.3 Cells are the smallest units of life that can perform all the functions of life.

1.4 THE CELL: THE BASIC UNIT OF LIFE

- 1.4.1 The cell is the basic unit of life.
- 1.4.2 All living organisms are made of cells.
- 1.4.3 Cells are the smallest units of life that can perform all the functions of life.

1.5 THE CELL: THE BASIC UNIT OF LIFE

- 1.5.1 The cell is the basic unit of life.
- 1.5.2 All living organisms are made of cells.
- 1.5.3 Cells are the smallest units of life that can perform all the functions of life.

1.6 THE CELL: THE BASIC UNIT OF LIFE

- 1.6.1 The cell is the basic unit of life.
- 1.6.2 All living organisms are made of cells.
- 1.6.3 Cells are the smallest units of life that can perform all the functions of life.

1.7 THE CELL: THE BASIC UNIT OF LIFE

- 1.7.1 The cell is the basic unit of life.
- 1.7.2 All living organisms are made of cells.
- 1.7.3 Cells are the smallest units of life that can perform all the functions of life.

- Environment Laws: Environment Protection Act; Air (Prevention & Control of Pollution) Act; Water (Prevention and control of Pollution) Act; Wildlife Protection Act; Forest Conservation Act. International agreements: Montreal and Kyoto protocols and Convention on Biological Diversity (CBD).
- Nature reserves, tribal populations and rights, and human wildlife conflicts in Indian context. (7 lectures)

Unit 7 : Human Communities and the Environment

- Human population growth: Impacts on environment, human health and welfare.
- Resettlement and rehabilitation of project affected persons; case studies.
- Disaster management : floods, earthquake, cyclones and landslides.
- Environmental movements : Chipko, Silent valley, Bishnois of Rajasthan.
- Environmental ethics: Role of Indian and other religions and cultures in environmental conservation.
- Environmental communication and public awareness, case studies (e.g., CNG vehicles in Delhi). (6 lectures)

Unit 8 : Field work

- Visit to an area to document environmental assets: river/ forest/ flora/fauna, etc.
- Visit to a local polluted site-Urban/Rural/Industrial/Agricultural.
- Study of common plants, insects, birds and basic principles of identification.
- Study of simple ecosystems-pond, river, Delhi Ridge, etc. (Equal to 5 lectures)

- g) A candidate opting for Genetics as an optional subject shall also opt for Chemistry/ Biochemistry and Botany / Zoology / Microbiology / Biotechnology / Sericulture as optional subjects.

7.4 PART-III:

A) Foundation, Skill Development or Interdisciplinary Courses (Common for all Programmes):

- i) Compulsory courses in the first and second semesters one in each semester
1. Constitution of India and Human Rights
 - × 2. Environment and Public Health *Read as Environmental Studies*
- ii) Any four skill development courses in the third, fourth, fifth and sixth semesters, one in each semester as prescribed by the concerned faculty and approved by the Academic Council. The courses may include the following:

Sem.	B.A.	B.Sc./B.C.A.	B.Com./BBA/BMS/BHM
III	Science and Society	Culture, Diversity & Society	Science and Society
IV	Life Skills /Personality Development	Life Skills / Personality Development	Life Skills / Personality Development
V	Banking & Finance / Building Mathematical Ability	Banking & Finance / Capital Market/ German / French	German / French / Sanskrit / Culture, Diversity and Society
VI	Entrepreneurship & Innovation / Computer Application & Information Technology	Entrepreneurship & Innovation / Computer Application & Information Technology	Creativity & Innovation / Value Education

- iii) One soft core course or allied subject each in the seventh and eight semesters of the integrated programme or in the first and second semesters of the post-graduate programmes, and one open elective in the ninth semester of the integrated master's programmes as prescribed by the respective Board of studies and approved by the Academic council. The soft core courses may include research methodology course, one of the foreign languages such as German, French etc. and any other course prescribed by the university from time to time.

B) Co-curricular and Extension Activities

A student shall opt for one of the following activities offered in the college, in each of the first four semesters of the undergraduate programmes. The activity carries a credit each and will be internally assessed for 50 marks.

- a) N.S.S. / N.C.C
- b) Sports and Games
- c) Physical Education or Activities related to Yoga
- d) Field studies / Industry Implant Training
- e) Involvement in campus publication
- f) Publication of articles in news papers, magazines or other publications
- g) Community work such as promotion of values of National Integration,

— / —

of A candidate applying for Director or an equivalent position shall also apply for (Chemistry, Microbiology and Botany / Zoology / Microbiology / Pathology) / Nutrition as optional subjects.

PART-III

A) Foundation, P.G. Development or Interdisciplinary Centre
 B) ... for all Programmes
